

Name: _____

SQL SELECT, WHERE, DISTINCT practice

1. Write a select statement to return all columns and rows from the customer table.

Select * from Customer;

2. Write a query to select first name, last name, and email from the customer table.

Select first-name, last-name, email from Customer;

3. Write a query to return all rows and columns from the film table.

Select * from film;

4. Write a query to return unique rows from the release_year column in the film table.

Select distinct release-year from film;

5. Write a query to return unique rows from the rental_rate column in the film table.

Select distinct rental-rate from film;

6. A customer left us some feedback about our store. Write a query to find her email address – for Nancy Thomas.

Select distinct email = 'Nancy Thomas' from Customer;

7. We're trying to find a customer located at a certain address '259 Ipoh Drive' – can you find their phone number?

Select distinct phone, address = '259Ipoh Drive' From Address;

8. Write a query from the customer table, where store id is 1 and address id is greater than 150.

Select * from customer where store-id=1 and address-id >150;

9. Write a query from the payment table where the amount is either 4.99 or 1.99.

Select * from payment where amount in (4.99,1.99);

10. Write a query to return a list of transitions from the payment table where the amount is greater than 5.

Select * from payment where amount > 5;
